## Project Proposal

Prepared for: William Molina| Omninet Capital, LLC

Prepared by: Jon Seeman, Sculptor

May 3, 2018

Dear Mr. Molina,

I was referred to you by the architect Dan Stanley to propose a sculpture design. When I conceptualized a sculpture for the County of Los Angeles Child Support Services Department Building, I immediately envisioned a design with a playful and uplifting feel that appeals particularly to the families, child advocates, who will come into view of the sculpture. The 6 feet tall art piece titled *Spiral Colors* will be mounted on a round concrete cylinder and located on the upper landing of the lobby to serve as a focal point.

Similar to artist Alexander Calder's technique, a spiral form balancing an array of gently rotating, brilliantly colored forms will provide a light-hearted diversion for families who are often visiting the offices feeling emotional or apprehensive. To create a more engaging sculpture, a family of abstract kinetic forms activated by a breeze stirs the imagination.

With safety at the forefront, forms are attached and permanently secured with heavy gauge, steel wires. All sculptural shapes and edges are rounded and then buffed to soften sharp corners.

The *Spiral Colors* sculpture will not only enhance the modern design of the County of Los Angeles Child Support Services Department Building but will provide an artistic creation to stir the imagination. Should you have any questions please feel free to contact me.

Best regards,

Jon Seeman
